Surface - 69°F

Maximum depth - 33 feet

30 feet - 68°F

Principal fisheries: Brown trout, brook trout, smallmouth bass, white perch, chain pickerel

improve forage for the brown trout and to provide additional fishing opportunities smelt eggs were transferred into Chickawaukie, but these transfers have failed to provide a significant smelt population.

A town owned boat-launching facility along with a day-use park is located off State Route 17 on the south shore of Chickawaukie Pond.

Surveyed - August, 1941

(Revised - 1963, 1989, 2006)

Maine Department of Inland Fisheries and Wildlife

Funded in part by the Federal Aid in

Restoration Act under

Federal Project F-28-P

L4822B

Chickawaukie Pond, located just north of Rockland, is one of the more popular waters of the mid-coast region. Unfortunately, the pond's water quality has deteriorated in recent years, primarily as a result of continuing agricultural and increasing residential development in the watershed. Despite this, Chickawaukie Pond continues to maintain a sport fishery for brown trout. A legal-size brook trout stocking program recently began due to the improvements of the Department's hatchery system hereby increasing the numbers of fish now available. To
